Potential competing interests: No potential competing interests to declare.

Reviewer's Comment#1: The introduction does not provide the latest updates in the area, the authors are invited to strengthen this section with relevant references.

Reviewer's Comment#2: There are some typos in the article and the word "in order to" is used many times in the article.

Reviewer's Comment#3: The discussion part should be developed in the section and not only focus in the literature review.
