Review of: "Representations and Implications of Papers Written by E.T. Whittaker in 1903 and 1904"

Sayyed Mohammad Hoseini

Potential competing interests: No potential competing interests to declare.

The author proposed the applications of E.T. Whittaker's work in physics. The article has nothing new and these are sensible. Thus it can be considered as a review article.

The article has typographical errors, such as:

1. In Introduction: quantum mechanics
2. Eq (1) does not match with the E.T. Whittaker’s 1903 paper. However, it doesn't seem that there is much problem in the proposed propositions.
4. The format of mathematical functions such as sin and cos should be correct.
