

Review of: "An Optimal Control for Ebola Virus Disease with a Convex Incidence Rate: Imputing from the Outbreak in Uganda"

Abayneh Kebede Fantaye¹

¹ Debre Tabor University

Potential competing interests: No potential competing interests to declare.

1. the endemic equilibrium points are written in terms of I^* , but I^* is not solved (should be written as some polynomial function).
2. The authors is not discussed on existence of an optimal control, it should be discussed.
3. The caption of a graph is not well written and the figures are very small.
4. figure 10 and figure 14 looks the same, I think the matlab code should be checked.
