

Review of: "Design of an intelligent controller for improving the solar system efficiency"

Yaser Ebazadeh

Potential competing interests: No potential competing interests to declare.

- Abstract is too short and should be modified. The novelty, system description, results, must be provided.
- Keywords is not suitable.
- A nomenclature is not available.
- The results and conclusion should be improved.
- The number of references is very small and the use of resources should be clearly stated and updated, following articles may be cited to improve the introduction:
