Potential competing interests: No potential competing interests to declare.

This is a special topic to research and write on it, and i think it will give a great perspective to the other researcers on your field and country.

There are some spelling errors and must be read sentnce by sentence by a native speaker and make corrections on the using language.

There are also some problems while writing in academic style. Please don't use "i", "we", "our" and etc. Always use 3rd and passive forms of the sentences.

There are also some problems on structure. Please rename all the heading and show the reader what is the most important heading and the second, and the third... And the most important part the author explain and give information about history but there is no references stated. (For example see at the top of the page 8) It seems that the author make some conclusion about the history and i fell it is wrong, the author made a research, so please show us the references on the text.

And please add a methods part or explain at the beggining and in "abstract" which tools and research styles used for this article.

Please check all the references in the text and in the references listand verso.

It will be more understandable if you revise the text.

Best regards,

Eylem Tataroğlu, Ph.D
