Potential competing interests: No potential competing interests to declare.

This Phenomenological study on Parental Role in Child Sexuality is very pertinent. I would suggest that the author(s) reduce significantly the content in the paper as it's too lengthy. It needs to be concise. The structure of the manuscript should be in the introduction in order to enable the reader to get a clear understanding of the different sections in the manuscript. Thereafter, sections should follow in the order Review of Literature, Gaps in Literature, Significance/Need of the study Hypotheses/Objectives, Methodology, Discussion of the results, Conclusions, Limitations and Scope for Future research. Please check the Referencing format and English language etc.
