Potential competing interests: No potential competing interests to declare.

First of all, the novelty of the research paper, its main contributions, and what gap it fills in the literature were not clearly explained by the author.

The literature section does not provide an adequate summary.

The manuscript's abstract and introduction need revision for clarity, conciseness, and a stronger focus on the research problem.

It's important to discuss potential biases in self-report survey results and limitations related to this type of data.

- While the results are presented clearly, they require a more in-depth discussion of their implications for the research objectives.
