# Valtorcitabine Dihydrochloride

National Cancer Institute

## Source

National Cancer Institute. *Valtorcitabine Dihydrochloride*. NCI Thesaurus. Code C90788.

A dihydrochloride salt form of valtorcitabine, a prodrug form of torcitabine (L-deoxycytidine), a nucleoside analog with activity against hepatitis B virus. Torcitabine is modified in vivo to its triphosphate form and acts as a competitive inhibitor of viral DNA polymerase.
