

Review of: "Shear performance of polypropylene fiber reinforced high-strength self-compacting concrete beams"

Jeyanthi J

Potential competing interests: No potential competing interests to declare.

The authors have done good experimental work.

The Introduction needs to be modified.

Also, the standard codes used in the testing procedures need to be included in the article.

The experimental test results should be validated with results from other methods.

The overall conclusion may be modified to indicate the maximum percentage of the polypropylene fibers.
