Analgesic Preparation

National Cancer Institute

Source

National Cancer Institute. *Analgesic Preparation*. NCI Thesaurus. Code C29631.

Natural or synthetic compound mixtures, Analgesic Preparations relieve pain by altering the perception of nociceptive stimuli without loss of consciousness. Analgesic compounds may act at opioid receptors (morphine-like drugs) or at other central or peripheral sites (non-steroidal anti-inflammatory agents). (NCI04)
