# Review of: "A Brief Summary of Prompting in Using GPT Models"

Minh-Tien Nguyen

The paper summarizes the prompting techniques for the use of ChatGPT.

- The abstract should show findings of prompting techniques by using ChatGPT.
- The second paragraph of Introduction: applications of ChatGPT such as "writing assistance, coding, and legal research, it is certain that those works" should have references.
- The motivation of the survey should be more emphasized in the Introduction.
- Section 2 seems to cover the summary of recent work and applications of prompting. However, the section should use a table for summarization instead of only using text.
- There are several prompting techniques summarized in the guideline:https://github.com/dair-ai/Prompt-Engineering-Guide. It is nice to see the summary in the theme of prompting methods. You can also find many papers of prompting from the guideline.
- The content and meaning of Section 2 and Section 3 seem to be overlapped. Please re-structure these sections.
- It is much better if the authors can show case studies that use prompting techniques with ChatGPT. It will encourage others to dig deeper the tecniques and apply to their problems.
