Article title:

Liver Function Test Abnormalities and Associated Factors Among Liver Disease Patients at the University of Gondar Comprehensive Specialized Hospital, Northwest, Ethiopia: A Cross-Sectional Study

- Very interesting information linking some liver function tests with infections and other habits
- In this article, **Total Bilirubin, AST, and ALT were assayed with other criteria:**
- **Some results need more discussion:**
- **Why drinking coffee and tea had effects on LFT more than alcohol consumption.**
- **Why farmers were more likely to have LFT abnormalities.**
- **Is psychological status having an effect on LFT?**
- **Rising of LFT may be affected by medication.**
