

Review of: "From International to Subnational: A Contribution to the Insertion of Subnational Governments in Northeastern Brazil in the Internationalization of Public Policies."

Opeyemi Alabede

Potential competing interests: No potential competing interests to declare.

Great piece of work you've got there. There is however the need to give a background information and analysis of the federal system in Brazil in order that those who are not familiar with the workings of federalism in Brazil would be able to judge right.

Also, the literature review should be rejigged by incorporating recent research findings and properly referencing the works cited.

More so, theoretical framework should well incorporated so as to provide the basis and foundation on which the research rests.

Once again, Good Job!
