Potential competing interests: No potential competing interests to declare.

1. Need to explain the abstract and introduction to be very clear with your appropriate results.
2. The authors should give an overview of the whole article in the introduction part. The current form looks messy.
3. Add proper citations wherever required throughout the manuscripts, particularly in the introduction.
4. The authors should mention the concept of this work with the progress against the most recent similar studies.
5. The scale bar of Figure 3 should be mentioned in the caption.
6. In Figure 2, replace 0,5, and other numbers with 0.5, etc.
7. The figures need to be improved.
8. More confirmatory tests are needed.
