

Review of: "Analyzing the nexus between Spatial Data Infrastructure Development and e-Government"

Eva A.Y. Houessou-Dossou

Potential competing interests: No potential competing interests to declare.

The study lacks precise and explicit information about the implementation of SDIs in Zimbabwe. Though the study's goal was to underline the benefits of integrating SDIs into the e-government platform, the study lacked in-depth discussion and failed to mention the advantages and disadvantages of such integration, as well as earlier work in other countries.
