Potential competing interests: No potential competing interests to declare.

First of all, I would like to thank the author for the improvements made.

I think that now the work better reflects the objectives.

The connection between East and West is very interesting, although going deeper with some other examples, besides India, would certainly enrich the text and would help to know other experiences as interesting as the ones that can be read in this work.

My personal recommendation would be to make some changes to the title, especially so that potential readers can know what they are going to find when reading this interesting work. I think that indicating that India and some western cases (not all) are studied and revised could be a good idea. Otherwise, indicating only a "deeper" study does not shed light on the real contents of the article.
