Great work, I enjoyed and appreciate your academic writing, need some changes:

1. The introduction and literature review sections are too lengthy and need to trim down
2. Explain the data collection procedure in a flow chart depicting the number of participants selected from each university/institute, how did u define the strata for the proportional stratified random sampling technique you used in your study
3. Explain how did you calculate your sample size.
4. Attach the final questionnaire for this study after piloting it in annexures.
5. The correlation between sociodemographic variables and Instructional immediacy, Perceived learning, and course satisfaction should also be explored and tabulated.
