Potential competing interests: No potential competing interests to declare.

The research article is informative, but the authors must improve the paper to make it coherent and systematic since this is a scholarly work.

I suggest the following:

In the Abstract, I propose this format: (1) introductory statement highlighting the importance of the study; (2) state the research problem; (3) indicate the main objective of the study; (4) concisely disclose the methodology and methods; (5) briefly enumerate the main findings; (6) manifest the central conclusion.

In the Introduction and Literature Review: In the later part, please clarify the research problem by identifying the literature gaps and explaining the connection to the research objective.

In Methodology and Methods: Please explain the methodology and the connection to the research problem or the main objective. Also, please show the link to the specific questions with the methods.

The Conclusion and Implications are absent, so I suggest the following format: (1) briefly summarize the essential findings and tie them up to the research problem of the study; (2) elaborately explain the contribution and the broader implications; (3) delineate the recommendations for future research.

In References, please add the classic and latest publications (including 2022 & 2023 journal articles and books).
