Potential competing interests: No potential competing interests to declare.

The research article deals with the topic of the effects of the coronavirus pandemic shift from face-to-face psychoanalytic sessions to remote ones. As many researchers around the world, also my colleagues and I have researched the impact of the pandemic and published our research in 2021: Delibašić, Milica, Zubanov, Violeta, Pupavac, Drago, Potočnik Topler, Jasna. Organisational behaviour during the pandemic. *Polish journal of management studies*. 2021, vol. 24, no. 1, str. 61-78. ISSN 2081-7452. DOI: [10.17512/pjms.2021.24.1.04](https://doi.org/10.17512/pjms.2021.24.1.04). I cannot provide a review as a field expert, but I can contribute some general points on how to improve the structure of the article that is definitely topical. The authors are advised to write a thorough literature review with the inclusion of up-to-date references, and add details about the research methods employed. This is considered a serious lack of the article despite the fact that clinical examples are mentioned and vignettes are included.
