Potential competing interests: No potential competing interests to declare.

*What is the innovation in the subject?

* What are the types and specifications of asphalt used, and what is the optimal ratio that was applied in the mixtures?

* What is the benefit of mixing polymers using the dry method, and is this economically beneficial?

* The Marshall test must be performed to evaluate the mixtures and judge them correctly.

* The suggested rates of addition are very high compared to the rates mentioned in previous studies!!!!

* It is necessary to make a gradation of solid materials, and what type will be replaced by added polymers?
