Potential competing interests: No potential competing interests to declare.

The Article posits to analyze the Startup Project Development. It is a worthy subject of research. The current research has good potential. However, the work needs more maturity and improvements in terms of execution. My detailed review is described below :

1. The "introduction" part fails to focus on the main research question/subject matter of the work in an effective way.
2. Authors must update the bibliography.
3. Discuss your conclusions in order of most to least important. Compare your results with those from other studies: Are they consistent? If not, discuss possible reasons for the difference. Would allow for the identification of potential development scenarios for the application.
