Review of: "Achieving Sustainability in Smart Cities Mission in India through Universities' Innovation in India"

Banwari Mittal[1]

1 Northern Kentucky University

The paper provides a comprehensive review of UN sustainability goals, The concept of Smart cities, the status of smart cities in India, and this critical review can be very helpful to other researchers and to public agencies. The research study shows that engineering colleges have not made real headway in getting students engaged with sustainability issues. Engaging college students can be hugely beneficial for igniting a higher level of climate action.
