Potential competing interests: No potential competing interests to declare.

- This is an interesting work. However, some suggestions can be useful to improve this article.
- The title is broad, so it must be modified to sound more scientific.
- The abstract lacks a clear purpose for the article.
- Introduction should include the background, the scientific importance, in addition to the objectives of the article; here it lacks objectives of the article.
- Although the introduction covered the background and importance of the article, it did not address the side effects of Ayurveda, in addition to the overlap between them and some treatments, which need to be highlighted in this article for greater clarity.
- The methodology and results are limited to four spp. only. Please explain the reason behind choosing that spp. in particular.
- The article lacks conclusions drawn from the study.
- Grammar needs some revision along the article.
