1 Universiti Tenaga Nasional

Paper Overview: The paper addresses the pressing issue of the environmental impact of the fashion industry and explores the role of sustainable fashion in mitigating these effects. It highlights the importance of fashion influencers in shaping consumer choices and discusses how behavioral physiology validation techniques can be used to promote sustainable fashion. The study employs a mixed-method approach and draws from behavioral science and design thinking to understand and influence behavior related to sustainable fashion choices.

Strengths:

Relevance and Timeliness: The paper addresses a critical and timely issue, the environmental impact of the fashion industry, and the role of influencers in promoting sustainable fashion. This topic is of growing importance in today's world.

Interdisciplinary Approach: The paper effectively combines behavioral science and design thinking, which adds depth to the study's methodology. This interdisciplinary approach is well-suited to tackle complex issues related to human behavior and sustainability.

Methodology: The study's methodology is well-described and appears to be comprehensive. The use of neuro-physiological and psycho-physiological markers, along with data science techniques, is innovative and promising for understanding consumer preferences and choices.

Suggestions for Improvement:

Clarity and Organization: While the paper provides a lot of valuable information, it could benefit from improved organization and clearer section headings. This would make it easier for readers to navigate and understand the flow of the paper.

Data Presentation: The paper mentions both qualitative and quantitative data analysis, but it would be helpful to provide more details on how the data will be collected, especially the qualitative data from interviews.

Practical Implications: The paper could benefit from discussing the practical implications of the findings. How can the insights from this study be applied to promote sustainable fashion in the real world?

Citations: Ensure that all references and citations are accurate and properly formatted according to the chosen citation style.

Conclusion: The paper lacks a clear conclusion section that summarizes the key findings and their significance. A well-structured conclusion can leave a lasting impact on readers.
