

Review of: "Valorization of palm oil wastes into oyster mushrooms (*Pleurotus* HK-37) and biogas production"

Ani Kingsley Amechi

Potential competing interests: No potential competing interests to declare.

I recommend minor revisions.

- I would kindly suggest that the author(s) represent the p-values as $P < 0.05$ significant levels in the abstract.
- I recommend the author(s) explain the abbreviations at the point of first mention, specifically in the abstract.
- In the introduction, the author(s) mentioned that "there are no studies in Tanzania". I would like to suggest that author(s) should consider the global novelty of their study instead.
- Use the equation editor to capture the multiplication sign equation 2.
- Kindly correct equation (4) using the equation editor.
- Kindly compare results for biogas production with previous works of different organic substrates.
