Unilateral polymicrogyria

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base*. [Unilateral polymicrogyria](#). ORPHA:268943

Unilateral polymicrogyria is a cerebral cortical malformation characterized by unilateral excessive cortical folding and abnormal cortical layering. It comprises two sub-types depending on the areas affected: unilateral hemispheric and focal polymicrogyria (see these terms).
