I think it is an interesting work and gives a birds' eye view about gamut of work in the field of CSR in China. There is a scope to enrich the paper, a few of suggestions include:

- i. Better mention whether CSSCI includes only domestic publications or others as well.
- ii. Inclusion of a couple of case-lets on gradual improvement in domestic issues related to CSR would help the reader.
- iii. Outline chronologically the regulations related to CSR in China during the period of the study i.e., 2006-2022 and see if there is any relation with the Keywords.
