Review of: "Data Science using openAI: testing their new capabilities focused on data science"

Heamn Abduljabbar[1]

1 Salahaddin University - Erbil

Abstract must be refined with clear criteria, short introduction, and clear research objective.

methods should be linked with the result and discussion clearly and the gap in the relative studies should be highlighted.

the conclusion must be summarized and findings must be bolded in simple words to the reader.

the topic is important and well done, in my openion it is suitable for publication.
