Review of: "Investigation and Synthesis of Benzothiazole-Derived Schiff Base Ligand Against Mycobacterium tuberculosis"

Shaimaa Ahmad Hassan¹

¹ ALKARKH UNIVERSITY FOR SCIENCE, Baghdad, Iraq

1. Abstract needs improvement.
2. In the practical part, there is no need to talk about Schiff's rule. Only the method of operation should be mentioned.
3. The temperature value was not mentioned.
4. The IR, HNMR, and MASS values were not mentioned accurately and clearly.
5. It should be explained why this compound was chosen, i.e., what are the characteristics of the initial compounds.
6. The authors are supposed to make the computational study more comprehensive.
