

Review of: "Impact of medical, surgical and expectant management on spontaneous miscarriage/abortion on first trimester: A systematic review and meta-analysis of randomized, controlled trials"

Hassan Dahie

Potential competing interests: No potential competing interests to declare.

The title is generally good; however, it could be more concise and direct. The current wording is lengthy, and a more streamlined version could enhance the overall readability and impact of the title, making it more appealing to a wider audience of researchers and clinicians.
