# Limb-Girdle Muscular Dystrophy Type 2Z

National Cancer Institute

## Source

National Cancer Institute. *Limb-Girdle Muscular Dystrophy Type 2Z*. NCI Thesaurus. Code C142082.

An autosomal recessive condition caused by mutation(s) in the POGLUT1 gene, encoding protein O-glucosyltransferase 1. It is characterized by progressive muscular dystrophy, primarily affecting the proximal muscles, resulting in difficulty walking.
