Potential competing interests: No potential competing interests to declare.

Topic is very relevant to women health. Conclusion was nicely done with WASH recommendation

Giving some necessary suggestions.

Abstract:

1. plz cite reference for " wide spread awareness of candidiasis "
2. Study aimed reproductive age group but post menopausal women were included.

Introduction and literature review:

1. First two paragraphs not needed.
2. Plz give reference of latest CDC study.
3. Types of candidiasis can be omitted.
4. Cite last five years references unless very necessary
5. Define menstrual hygiene criteria
6. define personal hygiene criteria

Aims of study:

1. plz elaborate " other factors".

Research Methodology:

Needs to be elaborated in relation to the the study conducted.

Area of study and participants:

1. patients age from prepuberty and menopause does not fit in reproductive age group
2. plz mention inclusion and exclusions criteria.
3. How the sample size was taken

Laboratory tests:

Plz mention by whom the vaginal sample be taken from the patient.

Result:

Too many tables.

Conclusion: In last paragraph,

1. Elaborate the “screening methods for vulvovaginal candidiasis”.
2. Elaborate the “regular examination needed for prevention of vulvovaginal candidiasis”.
