

Review of: "A Mini-Review On MXene Based Textiles For Electromagnetic Interference Shielding Application"

Yingying Zhou

Potential competing interests: The author(s) declared that no potential competing interests exist.

the Electromagnetic shielding theory is described in detail in the paper and some research cases were described in detail. the challenge in the field and the future research need to be done were pointed out. However, the following points need to be improved: firstly, the research cases need to be classified and summarized, what's more, The current challenges and corresponding research methods should be analyzed item by item
