Review of: "Summer Birth and Clinical Characteristics in Schizophrenia: A Cross-Sectional Study"

Serpil Cecen¹

1. Independent researcher

The subject of the study is interesting.

It is an inspiring feature for future studies on this subject.

Materials and methods are explained.

The tables are understandable.

The findings were discussed with literature information.

The limitations are specified.

The conclusion is written in an understandable manner.

The references are cited in the manuscript.

Is there a relationship between the birth month and other chronic diseases?

Can the answer to this question be added to the discussion?
