Dear editor in chief

1. In the abstract, they should bring the quantitated results and summarise the abstract section by deleting the first common lines of it.
2. Some figures like 1 can be deleted from the paper, and some of them should come in one figure for showing their differences, like metallography pictures.
3. Some results should come with error bars like hardness and tensile strength.
4. Where are the results of EDS in Fig. 7? Where is the Fig.? They should bring them with discussion based on up-to-date references. Where is Fig. 4?
5. They should rewrite the manuscript based on up-to-date references and discuss the results based on the construction of journals and journals.
6. English writing editing is suggested.
7. Major revision in the manuscript is recommended.

Best wishes
