**Potential competing interests:** No potential competing interests to declare.

Rewriting the abstract to include the primary goal, or objective, methodology, analysis and the findings is preferable

Pls avoid personalize language and remove the references from abstract

Have to incorporate keywords under abstract

This seems as conceptual paper can not find out empirical investigation

Even if this is a conceptual article, it still needs an aim, a methodology,

and a possible conclusion; a literature review alone is insufficient.

What about the analysis and methodology ( Philosophy, approach etc)

Have to follow the reference guidelines
