

# Review of: "What is the impact of the COVID-19 pandemic epoch on IPD (Inpatient Department) hospital admissions in India? - A 41months comparative, quantitative, deductive Cross-Sectional Research Study"

Soumik Gangopadhyay

Potential competing interests: The author(s) declared that no potential competing interests exist.

The article has methodically analysed the clinical crisis as predicted. But, few literature based comparative evidence regarding the availability of doctors and staff may protect the article from constructive criticism. Further, it is to be considered that contagious and non contagious diseases don't create similar emergencies. Beautifully narrated other reasons have a strong impact on the choice of hospitalization. It is more of subjective rather than objective.
