This research is exciting and a very current topic. However, several things must be ensured.

Write down all the abbreviations used at the beginning of the paragraph.

The author said the recording had been done on every patient in 10 minutes. What are the considerations for researchers to do this in just 10 minutes?

The author should complete the latest research results related to using the MST algorithm method for signal processing, especially in physiological signal processing.

Please explain why the Manhattan distance is used in this research method.

The data processing techniques provide good results and can be continued for future research.
