Histone H3-Like Centromeric Protein A

National Cancer Institute

Source

National Cancer Institute. *Histone H3-Like Centromeric Protein A*. NCI Thesaurus. Code C152974.

Histone H3-like centromeric protein A (140 aa, ~16 kDa) is encoded by the human CENPA gene. This protein plays a role in cell cycle progression, cell division and centromeric nucleosome assembly.
