

Review of: "In-Vitro Antibacterial Activity of some Ganoderma Species: A Review"

Ishita Bhattacharya

Potential competing interests: No potential competing interests to declare.

The manuscript is informative and well presented. But few things are missing in the manuscript.

1. No figure of the experimental organism
2. No figure of the disc diffusion or well diffusion method
3. No Table mentioning the MIC values. Only written in the text but should be reflected in tabular form.
