Potential competing interests: No potential competing interests to declare.

I was pleased to review your wonderful paper with best contribution. Please take the simple notes attached for you.

Only major revisions are needed before it can be published.

Abstract need to add more information about the results.

Add keywords.

Introduction section need to rewrite such as begin the section with much introduction for the title of papers.

Equations in the paper should be numbered.

Tables and figures should referenced before appear.

throughout the manuscript, there are several language mistakes. Therefore, I recommend a professional round of language editing before the paper is published.
