

# Review of: "Embedding Covid-safe behaviours into everyday life through an enhanced risk management approach"

Potential competing interests: The author(s) declared that no potential competing interests exist.

Title is appropriate for an important subject, but the main body of this manuscript is not enough.

This manuscript mainly discusses the necessities to develop strategies, but it doesn't provide methods or solutions, which should be covered as a main part under this big title.

On the other hand, the introduction of COVID-19 is very limited. Authors should at least introduce its outbreak and lockdown policies of China. (e.g., <https://doi.org/10.1016/j.scitotenv.2020.141347>)
