Dear editor/author

After reviewing the manuscript, please review the following points:

1. The abstract also needs revision.
2. The introduction is short and does not mention the necessity of research and other studies.
3. The methodology is incomplete and ambiguous. No explanation has been given regarding the sampling method of the research location, validity and reliability of the questionnaire.
4. How was the data analyzed and with what software and what version?
5. What statistical tests were used?
6. Validity and reliability of the questionnaire have not been reported.
7. The title of the tables is not correct. The way of reporting the data in the tables is not appropriate and the standard deviation is not stated.
8. The discussion and conclusions are very weak and need to be substantially strengthened.
9. The number of references is low and not acceptable. Use more and new references.
10. If you wish, read this article and refer to it:

Medical waste management among healthcare workers: the use of educational diagnosis phase in the precede planning model among healthcare workers in south of Iran
