

Review of: "Sharing Economy Practices in Changing Business Environment: Transaction Cost, Resource-Linking, and Hypercompetition Perspectives"

Alejandra Cueva

Potential competing interests: No potential competing interests to declare.

Dear Author,

This study case is interesting however is outdated. After COVID a new age for Sharing Economy started and change the behaviour of the model.

Here are some suggestions to improve the paper's quality:

1. Paper outdated, could be a good idea to mention the changes before and after COVID time.
2. There is not a definition about if the investigation is qualitative or quantitative.
3. Stronger methodology.
4. Conclusions and recommendations are quite simple.

The paper could be stronger with the mention changes.
