Anti-Infective Preparation

National Cancer Institute

Source

National Cancer Institute. *Anti-Infective Preparation*. NCI Thesaurus. Code C29637.

For internal or topical application, Anti-infective Preparations contain natural or synthetic antibiotic agents that act therapeutically or prophylactically against infectious viral, bacterial, protozoal, or other agents by inhibiting their growth, replication, and survival. Usually, antiinfective preparations are formulated sterile. (NCI04)
