Dear Authors,

Congratulations on your valuable research endeavor. Below are some suggestions regarding your manuscript:

**1. Clarification of Study Time Period:** In the Methods section, it would be beneficial to explicitly mention the time period of the study. This will provide readers with a clearer understanding of the temporal scope of your research.

**2. Structured Abstract:** Consider structuring your abstract to include more detailed explanations of the methods employed and the conclusions drawn. A structured abstract can enhance the clarity and comprehensiveness of your summary, ensuring that readers grasp the key aspects of your study more effectively.

**3. Title Clarification:** The phrase "quality of life" in your title may not be the most precise selection. Consider using "psychological status" instead, as it may better capture the essence of your research focus.

Overall, your manuscript holds promise, and addressing these suggestions will likely improve its clarity and impact.

Best regards,

Mohammad Reza Sharbafchi
