Potential competing interests: No potential competing interests to declare.

The following points regarding the relevant article should be taken into consideration.

- The number of sources in the empirical analysis section needs to be increased.
- Information should be given about which studies were used to create the scales used in the research.
- In Table 2, the number "2" is written twice.
- Reliability values of the variables should also be given in Table 1.
- In the discussion part of the research, the theoretical and practical contributions of the study should be emphasized.
- Limitations of the research and suggestions for future research should be added.
