Partial androgen insensitivity syndrome

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Partial androgen insensitivity syndrome. ORPHA:90797

Partial androgen insensitivity syndrome (PAIS) is a disorder of sex development (DSD) distinct from complete AIS (CAIS; see this term) characterized by the presence of abnormal genital development in a 46,XY individual with normal testis development and partial responsiveness to age-appropriate levels of androgens.
