Potential competing interests: No potential competing interests to declare.

The manuscript is of interest for the study of the limitations and solutions in the industrial production process of lactic acid, focusing on the use of sugarcane bagasse.

In order to be published, it would be advisable to carry out an in-depth review of the existing research in this field. It is recommended to carry out an exhaustive review of the grammar, as well as improve the quality of the figures in the manuscript, and also the abbreviations used throughout the article. Therefore, in general the writing of the article should be improved so that the research is properly understood.
