Canadian Cardiovascular Society Grading Scale Class II

National Cancer Institute

Source

National Cancer Institute. *Canadian Cardiovascular Society Grading Scale Class II*. NCI Thesaurus. Code C77266.

A grading of angina characterized by a slight limitation of ordinary activity. Angina occurs on walking or climbing stairs rapidly, walking uphill, walking or climbing stairs after meals, or in cold, in wind, or under emotional stress, or only during the few hours after awakening. Angina occurs on walking more than 2 blocks on the level and climbing more than 1 flight of ordinary stairs at a normal pace and in normal condition.
